(PRD00) Production - "Immersive-Digital-Media-Production"

Programme : Media Production
Department : Media
Prerequisites : CSEC® (Literature, Technical Drawing, VisualArts, TheatreArts, or Music) (CAPE® Performing Arts U1 and/or U2) or (satisfactory demo-reel/interview)
Type Of Course : Production
Course Title : "Immersive-Digital-Media-Production"
Course Code : PRD00
Credits : 3
Year : Year-One (1)
Semester : One (1) or Two (2)
Duration : 1 Semester, 15 weeks, 60 hours (4 hours per week),(Every Wednesday@12:00am) (Term: January-01_May-01)(Term: June-01_August-31)(Term: September-01_Demember-01)

Lecturer / Tutor : Israel Andrew Brown
Email : israelandrewbrown@proton.me
Website : https://github.com/israelandrewbrown
Discord : https://discord.gg/TsZG7jTQDA
Jitsi (Online-Meet) : https://meet.jit.si/moderated/d47831b6b5f4811d5a5f0c924ed16a82e98b84695720519de62319a4c6372dde
Resources : https://www.youtube.com/playlist?list=PL4ouDzfxGlYQK1rhavaAFrcFhmsT137EK

Rationale :This course addresses the growing need for digital-citizens who can integrate A.I. tools into traditional media creation workflows, to prepare them for an industry increasingly reliant on AI-enhanced production pipelines that maintain core storytelling and technical media production skills.

Description :
This course leverages State of The Art (SoTA) free and open-source artificial intelligence models and software to produce media (text, imagery, audio, 3d-printable-mesh). Building on foundational media composition skills (storytelling, storyboarding, animatic-creation, and video-editing), students will learn methods in artificial digital asset generation. Understand and utilize digital media production techniques to effectively; create, modify & compose artificially-generated digital assets into 2d/3d-printable-media. Troubleshoot common AI-related issues in media production.

Equipment (Required) : Laptop (≤16gb ram) (≤256gb ssd), e-Mouse, Microphone, ≤50mbps internet, room
Equipment (Edge-A.I) : (NVIDIA-GB10-Grace-Blackwell-Superchip) or (Apple-Silicon M-Series Chips)
Equipment (Optional) :4xWebCam, 4xUSB-C Cable, 3xTripods, 1Charuco Board, 1Helmet (relevant), Green-Screen

Objectives :

1. Understand and utilize media production techniques to effectively generate, modify,& compose artificially generated digital assets into media.
2. Understand how artificial intelligence models can address and resolve inefficiencies in digital media pipelines, improving overall productivity.
3. Identify, analyze, and resolve common issues arising from the use of artificial intelligence in digital media production.
4. Understand the limitations of automation in digital media production, recognizing which roles are more challenging to automate and why.

Course Assessment : Please note, knowledge gained from this course will be assessed in the "(PRJ00) Project – Individual Project" by its respective examiner.

cost-of-course/exam : $275.00 USD (fee-subject-to-change) (only-payable-via-bitcoin)

Donate Bitcoin : bc1qdjsljjzj4x83v28ks0l3cvwdkqvhyfggzc2w8v

This course material is intended for educational use and is based on the author's current understanding of the subject matter. While the author has taken reasonable steps to ensure the accuracy of the information presented, the rapidly evolving nature of artificial intelligence and media production means that some details may become outdated. The information in this book is distributed on an "As Is" basis without warranty. While every precaution has been taken in the preparation of the book, the author shall not have any liability to any person or entity with respect to any loss or damage caused or alleged to be caused directly or indirectly by the instructions contained in this book or by the operating systems, large language models, image diffusion models, computer vision models, computer software and hardware products described in it.

Week One
What is media? What is a “film”? What is a "characterization", “perspective” and “pacing”?
What is a computer? What is an operating system? What is hardware and software?
What is an algorithm? What is “Artificial Intelligence"? What is “software user documentation”?
What is a Large Language Model (LLM)? What is stable diffusion? What is cv / pose detection?
What is the “Chain-of-Thought” and “Zero-shot”? What is a ControlNet? What is a.i. Hallucination?
What is the “e-pipeline” and its roles”? What is scarcity and abundance? What is a.i-slop?
What is an influence?What is “Glaze”software?What is “digital-watermarking”?What is “a.i.-shot-mining”?
What is “free and open source”.? What are free and open source software licenses?
Why are file formats; [(.txt)(.jpeg)(.stl)(.usd)(.ogg)(.FLAC)(.srt)(.glb)(.csv)(.openEXR)(.mkv)] used?

What is a “production-meeting”? What is creative “control” and “freedom”? What is “trial-and-error”.
What is “Edge Artificial Intelligence"? How to set up an “Edge Artificial Intelligence" workstation?
How to install relevant “free and open-source” models? Eg. “pinokio.computer” or “pinokio.co”

(ollama) (WebUI[Gradio]) (ComfyUI)

Week Two
(Lecture) Story Development (5-Ws, 3-Act-Structure, protonganist/antagonist)
(Tutorial) Research/Story [browser-use][text-to-text] (OpenWebUI [deepseek-R1])

Week Three
(Lecture) Concept Development (Silhouette-Shape-Language)
(Tutorial) Visual Concept [t2i, i2i] <Characters/Props/Set> (Stable-Diffusion-Web-UI [sd-v2.1])

Week Four-Seven
(Lecture) Audio Development
(Tutorial) Expressive Voice Over (VC/tts/csm) (chatterbox-VC/tts)
(Tutorial) Sound Effects [text-to-audio] (Stable-Audio-Open-1.0) (MMAudio)
(Tutorial) Audio-to-MIDI / Split Instrumentals&Vocal (Spotify-Basic-Pitch) (UVR-v5)
(Tutorial) Music Design [audio-to-audio] (YuE[ICL])(DiffRhythm[ICL])(ACE-Step[ICL])
(Tutorial) Subtitles [audio-to-text] (Whisper-v3)

Week Eight
(Lecture) Hybrid-Composition-2d/3d [non-destructive-edit] (beats, pre/post-boards, shots)

Week Nine
(Lecture) characterization-through-performance (reference, dramatization, critique)

Week Ten
(Lecture) Mesh Development (Retopology)
(Tutorial) Image-to-3dMesh <Characters/Props/Set> (Tripo-SR) (Tripo-SG) (Direct3D-S2)

Week Eleven
(Lecture) Look Development (Texture-Transfer)
(Tutorial) 3dMesh-to-PBR/NPR <Characters/Props/Set> (hunyuan3D-2.1) (StableGen)

Week Twelve
(Lecture) Motion Development
(Tutorial) Non-Deform-Rig (pivots, child/parent, controllers)
(Tutorial) Deform-Rig (Template [Rigify-HumanMetaRig]) (orient, bind, skin, weight, test)

Week Thirteen
(Lecture) Motion Development (cont’d)
(Tutorial) “Face” - Motion Capture (FaceLandmarkLink-V0.23)
(Tutorial) “Body” - Motion Capture (FreeMoCap-v1.7)

Week Fourteen
(Lecture) Motion Development (cont’d) (VFX) (FX) [dedicated-gpu-required] [online]
(Tutorial) Image [t2i, i2i] (Qwen-Image [dyPE])
(Tutorial) Video [t2v, i2v, v2v, v2vWa] (LTX-2) (Wan2.2/Wan2.2-Animate)
(Tutorial) 3D-Camera-Track (Colmap x Golmap)
(Tutorial) Rotoscope/Chroma-Key (RotoForge-AI[sam-hq]) (rembg)
(Tutorial) Re-Light (map [*albedo,normal,depth,metallic,roughness*])(comos-transfer1-diffusion-render)
(Tutorial) text/inPainting/outPainting-to-360HDRI (DiT360)
(Tutorial) image/video_Upscaler-to-≥4k (real-ESRGAN)

Week Fifteen :
(Critique) Showcase and review of completed projects.

(PRJ00) Project – Individual/Group Project

Individual/Group Short Film (1minutes - 15minutes) (250 marks)
Pre-Production, Production and Post-production, Marketing and Distribution.
(By Group [≥6 memebers], or Individually produce a short film. This Project has five [5] sections.)
(Yearly-Due-Date: June-01/August-01/December-01) (Yearly-Result-Date:June-30/August-31/December-31)
(To document the project create five [5] folders, for the sections of the project)
(share Cloud-Drive permissions to either of the email addresses.)
Email: <israelandrewbrown@proton.me> <israelandrewbrown@gmail.com>

Section One - Pre-production (20%)
Construct a film-preproduction-package (.pdf) containing the following:

1. Research-Paper/Presentation (When, Where, Who, Why, What)
2. Treatment (Author, Title, Log-line, Synopsis, Characters)
3. Screenplay (three-act-structure)(use standard-screenplay-software)(3pages ≥ *x* ≥ 15pages)
4. Concept Art (characters - two [≤2]) (antagonist and protagonist)
   - bio,
   - turnarounds,
   - face expressions,
   - action poses,

   Concept Art (props)
   Concept Art (environment [hemisphere]) (set [cube]) (segmentation) (composition)
5. Story-Beats (coloured-images of important events/panels of scene)
6. Shot List (scene no., shot no.,shot type, shot descr., camera movement, Location)
7. Storyboard (colour coded characters, direct of movement, camera movement)
8. Animatic (panel/keyframe, camera movement, sound effects and expressive voiceover)
9. Expenditure (Gantt-Chart, Human resources, Software/Equipment and Budget)
10. Funding (Greenlight Statement - Proof-Of-Funding)
    [Presentation for "Summary Of Pre-production"]

Section Two - Production (20%)
Catalogue (.zip) of the files for the following artificially generated digital assets:

1. Assets - (Text-Concept) (.txt)(.fountain)
2. Assets - (Visual-Concept) (.jpeg)(.exr)(.mkv)
3. Assets - (Expressive Voiceover, Subtitles, Sound Effects, Music) (.FLAC)(.srt)
4. Assets - (Character-Prop-World [Mesh x PBR-Texture]) (3d-printable) (.usd)(.stl)(.glb)
5. Assets - (Motion Capture Data [2d/3d-Pose] [Input data, output data]) (.csv)(.mkv)

Section Three - Post-production (20%)
Create a; Physically-Based-Rendering (PBR) or Non-Photorealistic-Render (NPR) styled film (.mkv)**:**

1. Modification of "artificially generated digital assets".
2. Composition of "artificially generated digital assets" into a complete shot.
3. Utilization of FX, VFX (part-scene-replacement, relighting), to enhance film composition.
4. Arrangement of shots through video editing and color grading.
5. Presentation of film as a singular sequence.

Selection Four - Marketing (20%)
Create a website (.pdf) for the studio.

1. Brand Identity (logo, font, colour-palette, etc.)
2. Poster (YouTube Thumbnail) (Cover Art) (Title Card)
3. Studio Information (Home, About, Contact [Studio and Workers], Blog, Merch [optional])
4. Credits Sequence (video and spreadsheet)
5. Grant, Direct-Promotion, Indirect-Promotion, Rebate, Tax-Credit.

Section Five - Distribution (20%)
[Optional Distribution through Film Festival]
YouTube® Channel Creation - Upload in order. (H.264/H.265 codec) (≥720p). (5 x .mkv)

1. Teaser - Title Card (Thirty [10] seconds)
2. Teaser (Ten-Thirty [10-30] seconds)
3. Trailer (one [1] minute - three [3] minutes)
4. Behind-the-scenes Documentary (15-60 minutes)
   a. Teaser at the beginning and title card at end
   b. Footage of some of the work being done.
   c. Processes and visual breakdown of artificially generated digital assets.
   d. Interview of the project manager/director/lecturer.
5. Completed Short Film (1-15 minutes)

There should be five (5) videos on the channel/profile playlist at completion.

Section Four - Distribution (20%)			Exam-Only [ ]
Category	**Summary**	**Citeria-Checklist**	**Marks**
Title Card Teaser (10 seconds)	Branded YouTube channel with 10s title card teaser uploaded.	[ ] Channel Created: A link to the YouTube channel is provided. [ ] Channel Art: Banner and profile icon are uploaded. [ ] About Page: The "About" section is filled out. [ ] Upload: The Title Card Teaser is the first video on the channel. [ ] SEO: The video has a title, description, and at least 5 tags. [ ] Thumbnail: A custom thumbnail is uploaded for the video. [ ] Length: The video is 10 seconds. [ ] Call to Action: Description includes a link or call to subscribe. [ ] Resolution: The video is uploaded in at least 720p. [ ] Playlist: The video is added to a "Project" playlist. [ ] Deduction of category marks awarded, if video uploaded is not relevant to treatment. Video URL: www.youtube.com/	/10
Teaser (10-30 seconds)	10-30s non-spoiler video teaser uploaded.	[ ] Uploaded: The teaser is the second video on the channel. [ ] Content: Contains no footage from the film's final 25% of runtime. [ ] Pacing: The average shot length is under 2 seconds. [ ] Audio: Contains both music and at least one sound effect. [ ] Branding: The studio logo or film title is visible. [ ] Length: The video runtime is between 10 and 30 seconds. [ ] SEO: The video has a unique title, description, and tags. [ ] CTA: Description includes a call to action. [ ] Quality: Uploaded in at least 720p. [ ] Thumbnail: A custom thumbnail is uploaded. [ ] Deduction of category marks awarded, if video uploaded is not relevant to treatment. Video URL: www.youtube.com/	/10
Trailer (1-3 minutes)	1-3 minute story-based trailer uploaded.	[ ] Uploaded: The trailer is the third video on the channel. [ ] Structure: Shows elements from Act 1 and Act 2 of the film. [ ] Music: Uses at least two different music cues. [ ] Pacing: Pacing increases (shorter cuts) in the final third of the trailer. [ ] Length: The video runtime is between 1 and 3 minutes. [ ] Information: A title card with the film title is included. [ ] Audio: Dialogue from the film is included. [ ] SEO: Optimized with unique title, description, and tags. [ ] Quality: Uploaded in at least 720p. [ ] Thumbnail: A thumbnail is uploaded. [ ] Deduction of category marks awarded, if video uploaded is not relevant to treatment. Video URL: www.youtube.com/	/10
Behind-the-Scenes Doc. (<7 minutes)	BTS video (<7m) with all required segments uploaded.	[ ] Uploaded: The BTS is the fourth video on the channel. [ ] Content Req. 1: Includes footage of work being done. [ ] Content Req. 2: Includes visual breakdown of five types of assets. [ ] Content Req. 3: Includes an interview segment. [ ] Structure: Includes an opening title card. [ ] Length: The video runtime is under 7 minutes. [ ] Audio: Interview audio is clear and audible. [ ] SEO: Optimized with unique title, description, and tags. [ ] Quality: Uploaded in at least 720p. [ ] Thumbnail: A custom thumbnail is uploaded. [ ] Deduction of category marks awarded, if video uploaded is not relevant to treatment. Video URL: www.youtube.com/	/10
Completed Short Film (1-15 minutes)	Final film (1-15m) with captions and end screen uploaded.	[ ] Uploaded: The final film is the fifth video on the channel. [ ] Upload Quality: Uploaded at native resolution (≤720p). [ ] Audio Quality: Audio is stereo AAC at ≥192 kbps with no clipping. [ ] Length: The video runtime is between 1 and 15 minutes. [ ] Credits: Full credit roll is included in the video. [ ] Thumbnail/Title/Desc.: All are optimized and present. [ ] End Screen: [ ] Privacy: Video is set to "Public" or "Unlisted" as required. [ ] Captions: An accurate, manually created .srt caption file is uploaded. [ ] Completeness: The uploaded film matches the final rendered file. [ ] Deduction of category marks awarded, if video uploaded is not relevant to treatment. Video URL: www.youtube.com/	/10

Exam-Only [ ]

Examinators Remarks (If applicable)**:**	**Signature and Stamp Of Examiner:**

Section	**Marks (Awarded)**	**Marks (Maxium)**	**Percentage Score = (Raw ÷ Max) × 100**	**Weight (20%)**	**Final Grade = (Percentage × 0.20)**
1 - Pre-production		100		20%	
2 - Production		25		20%	
3 - Post-Production		50		20%	
4 - Marketing		25		20%	
5 - Distribution		50		20%	
Totals		250		100%	Final Grade

Please note, to use this:
1. Plug in the marks awarded.
2. Divide by the “maximum marks” to get the percentage.
3. Multiply by 0.20 (since each section = 20%).
4. Add all five contributions to get the final grade (out of 100).

GRADING SCHEME

Grade	% Equivalent	Level of Pass
A	90 – 100	Honours
A-	80 – 89	Honours
B+	75 – 79	Credits
B	70 – 74	Credits
B-	66– 69	Credits
C+	60 – 65	Pass
C	55 – 59	Pass
C-	50 – 54	Acceptable Pass
D	45 – 49	Fail - Supplemental
F	44 – 0	Fail

*Candidates registered for the course or the *"exam-only"* are allowed to inference either the *free and open-source* or *closed-source* a.i. models.

*Monthly subscription fees for each service provider range from **$25.00 USD** to **$100.00 USD**, on average. These subscriptions grant comprehensive access to all required functionalities and media categories—**text, imagery, audio, mesh, movement, video, relighting**—necessary to complete the course, associated projects, or the exam-only track.

*For planning purposes, candidates should note that the instructional period spans **15 weeks (approximately 3.5 months)** and requires access to services from **10 ten distinct providers**. Accordingly, individuals pursuing the the course or the *"exam-only"* **pathway** are advised to allocate a total budget of **no less than $875.00 USD and up to $3,500.00 USD**, depending on provider selection and subscription tier, to ensure continuous access to the proprietary, closed-source AI tools referenced above.

*In addition to software subscriptions, candidates must also allocate approximately **$2,000.00 USD for essential hardware**. This includes a laptop ($1,200.00), tablet ($300.00), stereo set ($250.00), mouse ($100.00), and e-pencil ($100). These items are necessary to support the full range of course activities and media interactions.

*Lastly, **per candidate**, to enrol in this course or sit the exam, it will cost **$275.00 USD** (fee subject to change).

*$1.00USD = $160.00JMD, as of November-11-2025.

"The Ten Essential Roles On The New Pipeline"
Producer A producer guides a film from its beginning to its completion. They have a hand in organizing and scheduling, budgeting and hiring, creative problem-solving and overseeing, and marketing and distributing. A producer may be a self-employed contractor, or subject to the authority of an employer such as a production company or studio. They are involved throughout all phases of production from inception to completion. <citation>
Attorney-At-Law [Lawyer] A lawyer (also called attorney, counsel, or counselor) is a licensed professional who advises and represents others in legal matters. <citation>
Accountant An accountant is a financial professional who reviews and analyses financial records and keeps track of a company's or individual's income, expenditures, and liabilities. An accountant may also work in project planning, cost analysis, auditing, and financial decision-making. Some specialize in tax preparation and tax planning. Accountants may work for large companies or external accounting firms. They must meet state-specific educational and testing requirements and are certified by national professional associations. <citation>
Director This person is responsible for designing sets, overseeing construction workers and other artists, and playing a part in figuring out the overall aesthetic of a movie production. <citation>.
Layout-Artist / Animatic-Artist This person creates animatics, which are sequences of images, shots, or sketches that are used to plan a video. Animatics are used in many fields, including animation, television commercials, and movie production. Animatics are a technique that comes after storyboarding, and they can help ensure that a project is on track and will be effective. They can be used to: see how the final product might look. Give a rough draft of how a particular idea will play out. Animatics are usually made by editing storyboard images together with dialogue, sound effects, and music. <citation>
Technical (Rigging) Artist This person (Programmer) helps video game development teams create interactive, visually appealing games for consoles and apps. They use both artistic and coding skills to integrate artwork and animation into complex game systems and film. <citation>.
Artificial Intelligence Operator [Story] [Concept] [Audio] [Prop] [Look] [Movement] This (Developer) is a professional who designs, trains, and monitors AI systems. They work as a liaison between human operators and AI systems, ensuring that AI systems are integrated into existing workflows. <citation>.
VFX Compositing Artist This is the last piece of the puzzle you need to make effects look realistic. It combines the work of animators, videographers, and special effects artists to create effects that blur lines. <citation>.
Video Editor This person uses scenes, takes, and shots to create a cohesive story for the screen. Editors use continuity editing, cutaways, and transitions to evoke certain emotions from the viewer and properly execute an entertaining plot. Video editors for film cut a scene from different angles, which directs the viewer to certain details in a story. <citation>.
Graphic Designer Graphic designers create visual concepts, using computer software or by hand, to communicate ideas that inspire, inform, and captivate consumers. <citation>

Power Tools	Cordless Angle-grinder	35,000.00		
Power Tools	Portable Welding-plant	35,000.00		
Power Tools	Cordless Circle saw	35,000.00		
Power Tools	Cordless Chainsaw	35,000.00		
Workshop Tools	Hammer	3,500.00		
Workshop Tools	Pipe-cutter	3,500.00		
Workshop Tools	Level	3,500.00		
Workshop Tools	Tape measure	3,500.00		
Workshop Tools	Hacksaw	3,500.00		
Workshop Tools	Saw	3,500.00		
Workshop Tools	Wire-cutter	3,500.00		
Workshop Tools	Adjustable Wrench	3,500.00		
Workshop Tools	Tile-Cutter	3,500.00		
Workshop Tools	Shovel (big)	3,500.00		
Workshop Tools	Ladder	3,500.00		
Workshop Tools	Wheel-Borrow	3,500.00		
Workshop Tools	Cement bucket	1,600.00		
Workshop Tools	Plastic bucket	1,600.00		
Workshop Tools	Mallet	1,600.00		
Painting Supplies	Paint roller & tray bundle	4,800.00		
Painting Supplies	Paint Brushes (x3)	4,800.00		

Budget Estimate Summary

Category	Projected Cost (JMD)	Actual Budget (JMD)	Difference (JMD)
Appliances & Furniture	560,000.00		
Building Materials	500,000.00		
Core Construction & Infrastructure	1,140,000.00		
Land Acquisition	3,500,000.00		
Painting Supplies	9,600.00		
Plumbing & Fixtures	75,000.00		
Power Tools	175,000.00		
Technology & Electronics	440,000.00		
Utilities & Energy	255,000.00		
Workshop Tools	46,800.00		
Total (JMD)	6,701,900.00		
Total (USD)	$41,886.88		

Exchange Rate Applied: 1 USD = 160 JMD

Figure 1: Table showing a budget for the studio.

*Labour cost not included. *Adhesive (weld-rods, nails, tin-set, paint, ect.) cost not included.
*Also, solar-light, windows, and safety-gear are not included.
